Exfoliating Cleanser

- Traditional ingredients such as hydroquinone, benzoyl peroxide and glycolic acid can cause long-term damage to the skin.
- Chirally-correct alternatives such as AGP Complex exfoliating for results without irritation.
- Chirally-correct ingredients use natural preservatives that do not cause inflammation—the primary cause of premature aging. Traditional preservatives can create skin sensitivities; however, chirally correct ingredients can help to alleviate such allergic reactions.
- Some ingredients are chirally correct by nature.
